4. What services do you offer?

We offer a wide range of software development services, including web application development, mobile application development, custom software development, software testing and quality assurance, and software maintenance and support.

5. What industries do you specialize in?

We have experience working with clients in various industries, including healthcare, finance, e-commerce, education, and more.

6. How long does it take to complete a software development project?

The timeline for a software development project depends on the scope of the project, the complexity of the requirements, and the resources available. We work closely with our clients to develop realistic timelines and ensure timely delivery.

7. What is your pricing model?

Our pricing model varies depending on the specific project requirements. We offer both fixed-price and hourly pricing models, and we work with our clients to find a pricing structure that works best for them. Typically our services are up to \$40 – \$60 / hour depending on the needs of the client. However, we understand you're on a tight budget, we will try our best to fit your company's needs.

8. How do you ensure the quality of the software you develop?

We have a rigorous quality assurance process that includes thorough testing at every stage of development. We also employ automated testing tools and conduct code reviews to ensure the highest possible quality.

9. What technology stack do you use?

We work with a variety of technology stacks, including popular programming languages like Java, Python, and JavaScript, as well as frameworks like Angular, React, and Vue.

10. Do you offer ongoing software maintenance and support?

Yes, we offer ongoing maintenance and support services to ensure that your software continues to function optimally and meets your evolving business needs.

11. How do you handle communication with clients during the development process?

We maintain regular communication with our clients throughout the development process, providing frequent updates and progress reports. We use a variety of communication channels, including email, phone, and video conferencing.

12. How do you protect sensitive information during the development process?

We take data security and privacy very seriously, and we have strict protocols in place to protect our clients' sensitive information. We use secure communication channels, employ encryption, and follow industry best practices for data protection.

13. How do I get started working with your agency?

The first step is to contact us and schedule an initial consultation. We will discuss your software development needs, provide a detailed project proposal and timeline, and work with you to develop a plan that meets your specific requirements.
